

A large, blue, petal-shaped solar panel system mounted on a teal, cone-shaped base. The petals are arranged in a fan-like pattern, and the base has a stylized flower logo. The system is set against a clear blue sky with some clouds.

smartflower

The smart, simple
& stunning solar system

smartflower is the next level of solar energy. Beneath its elegant design is a remarkably intelligent system fully integrated with smart features that make **smartflower** up to 40% more efficient in energy production.

SmartFlower Solar™ | smartflowersolar.com

The world's most intelligent solar system

Simple.

Designed to be a plug-and-play system. Our **smartflower** technicians can set it up in just a few hours with no significant construction or building modification.

Independent.

Self-cleaning and cooling features keep **smartflower** running at maximum efficiency.

Efficient.

Smart tracking helps **smartflower** stay at the optimal angle to the sun throughout the day for 40% more energy production.

Elegant.

Unique and powerful features packaged in an award-winning design.

Catch every last ray of sunlight.

The smart tracking system is the core of **smartflower's** brilliance. Every morning at sunrise, **smartflower** automatically unfolds itself. The dual-axis system allows **smartflower's** modular fan to follow the sun across the sky throughout the day, always maintaining the optimal angle to the sun. This makes **smartflower** 40% more efficient and capable of producing 4,000-6,200 kWh/year, depending on your location.

EV Compatible

smartflower can be used to charge electric vehicles thanks to easy integration with external EV charging stations. For organizations and companies, EV charging capacity is your "green business card," and is perfect for public spaces, shopping centers, hotels, restaurants, small businesses, and more.
